Date	Activities	Remarks / Indicators
February 22, 2024	 <p>On February 22, our team embarked on a pivotal mission to introduce our innovative product to the Barangay Captain and key personnel of Barangay Makawa. With the Barangay Secretary and other officials present, we meticulously showcased the features and benefits of our system, emphasizing its intuitive design and efficiency in handling SGLGB documents. We took the opportunity to engage in detailed discussions, providing insights into how our technology can revolutionize their administrative workflows, simplifying tasks that were previously cumbersome and time-consuming. The reception from the Barangay Makawa representatives was nothing short of inspiring, as they expressed genuine excitement and appreciation for the potential impact our solution could have on their operations. The collaborative atmosphere fostered during the presentation underscored the mutual commitment to progress and innovation, leaving us energized by the positive feedback and eager to continue our partnership with Barangay Makawa in embracing modernization for the betterment of their community.</p>

On February 23, our efforts continued as we extended our product presentation to two additional barangays within the Aloran municipality. In addition to showcasing the functionalities of our system, we took a hands-on approach, guiding participants through practical demonstrations on how to utilize the platform effectively. Recognizing the crucial role of barangay secretaries in managing administrative tasks, we dedicated time to train them specifically on the system's administrative functionalities. Through this interactive session, valuable insights emerged, leading us to identify areas where adjustments to the system could enhance user experience and usability. These collaborative discussions sparked innovative ideas aimed at refining features to ensure the system remains user-friendly and intuitive for all stakeholders involved. Our engagement with these barangays underscored our commitment to empowering local communities with efficient and accessible technology solutions tailored to their needs, ultimately driving positive change and progress within the Aloran municipality.

February 26,
2024

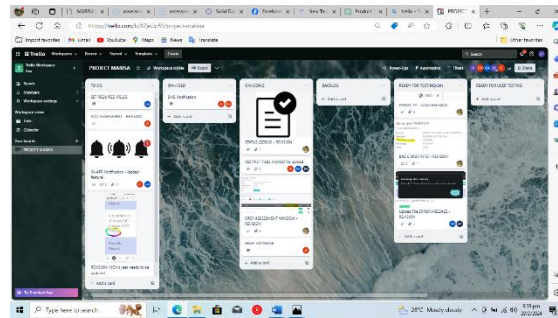

On February 26, our day was marked by the exciting venture of setting up our new workplace. However, before diving into this task, we convened at the school for a pivotal meeting alongside our esteemed project manager, Sir Badiang, and Engr. Ruiz. Together, we strategized and outlined the tasks to be accomplished within the week ahead, ensuring clarity and alignment in our objectives. The meeting proceeded smoothly, fostering an atmosphere of collaboration and productivity. With Sir Badiang's guidance, we explored innovative methods of teamwork, particularly focusing on leveraging GitHub for enhanced collaboration. Our morning was dedicated to configuring our laptops and organizing our workspace, laying the groundwork for a week of efficiency and progress. In the afternoon, we transitioned to setting up our new office space, where we would embark on our tasks. Overall, it was a highly productive day, filled with strategic planning, teamwork, and the exciting beginning of our journey in our new workspace.

February 27,
2024

On February 27, our team delved into the heart of our project's tasks. While some of my colleagues were immersed in setting up the intricate codes essential to our system, I redirected my focus towards assisting another colleague in the creative endeavor of crafting a new logo for our project. Together, we brainstormed ideas and honed in on a design that encapsulated the essence of our system. Providing guidance and input, I ensured that the logo aligned seamlessly with our project's vision and purpose. Once the logo design was finalized, I eagerly transitioned to my own task, fueled by excitement and determination. As the codes began to take shape and our project gained momentum, the day was marked by a sense of collaboration, creativity, and progress.

February 28,
2024

On February 28, our plans were momentarily disrupted due to a scheduled meeting involving all the SK officials of Aloran, requiring our workplace for the gathering. Consequently, we had to relocate to ensure the continuity of our tasks. Opting to continue our work at our boarding house, we promptly made the necessary arrangements. As my colleagues focused on their respective assignments, I dedicated my efforts to revising certain features of our system. Specifically, my task involved refining the error messages related to file uploads and implementing restrictions on the types of files that could be uploaded. While I successfully tackled the initial aspect of my task, addressing the upload file error messages, the latter proved to be more intricate and challenging. Nonetheless, with determination and perseverance, I remained committed to resolving this aspect of the task to ensure the seamless functionality and user experience of our system.

February 28,
2024

On February 29, our efforts culminated in a significant breakthrough as I successfully resolved the issue regarding restricted files for uploads within our system. After meticulous troubleshooting and implementation, the solution was seamlessly integrated into our platform. With the problem resolved, I eagerly applied the solution to the system to test its functionality and ensure its efficacy. This pivotal milestone marked a moment of triumph for our team, reflecting our dedication to overcoming challenges and refining our product to meet the highest standards. With this obstacle overcome, we were one step closer to delivering a robust and user-friendly system that would effectively serve its purpose within our community.
